

Sexual harassment at workplace bill has been drafted in gross violation of democratic lawmaking principles and will create a parallel extortion industry if allowed in its present format

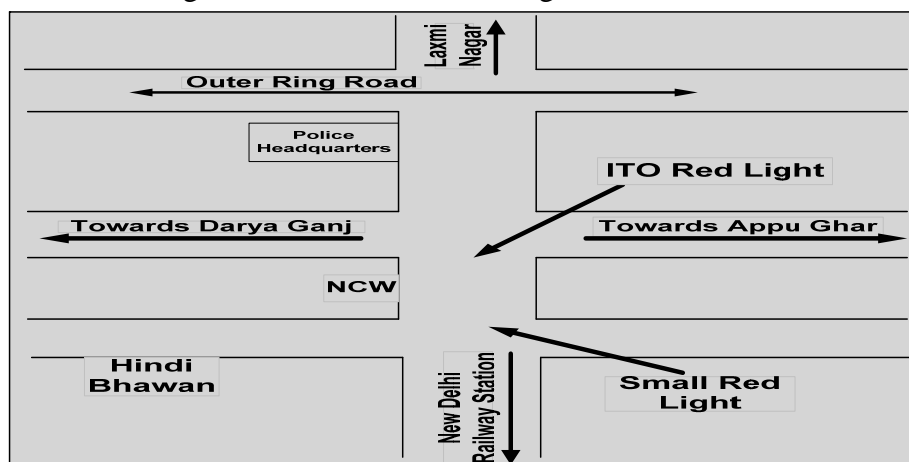

The Sexual harassment at workplace bill draft is in clear violation of Vishaka guidelines and has also not adopted the overwhelming public opinion to make the bill gender neutral. Apart from mandating the *involvement of fund chasing , gender obsessed & ideological NGOs* in investigating committees to making punishment for misuse *discretionary* to including options for *settlements* in cases , all provisions pointing to the clear motive of starting a self sustaining “**Legal extortion industry**” at the workplace.

Save Indian Family Foundation along with a Coalition of Indian and International NGO’s cordially invites you to a Press Conference against the current form of

Sexual Harassment at Workplace Bill
