For  
Public Information Officer - I

As desired, the reply of the questions raised in the subject K 11 application are given as under:

**Question No. 1**

Gender wise distribution of the number of people who died/injured during the construction of Delhi Metro are being submitted in the desired format:

S. No.	No. of Men died	No. of Men injured	No. of Women died	No. of Women injured
01.	111	107	01	Nil

**Question No. 2**

During the construction of Delhi Metro, preventive actions regarding any type of accident are through the various safety requirements governed by statutory laws like Delhi's Building and Other Construction Workers (DBOCW) Rules and Contractual provisions of DMRC Contract conditions on Safety, Health and Environment.

Ensuring the compliance of these statutory and contractual requirements at work sites is the responsibility of the contractor. The same is monitored by DMRC Site Engineers and Safety team from the corporate Hqrs and the General Consultant's Safety experts.

The system adopted for preventing accident is:

i. Contractors Organizational Capability & Competence

Each contractor appoints and employs a team of qualified SHE Professionals. The size, make up and qualifications and experience required is laid down in the Contract conditions. This team within each contractor's organization is dedicated exclusively to safety duties. The Contractor's Project Manager and his Safety team undertake inspections of the works for ensuring compliance of Safety requirements.

- ii. External SHE Audit: Under the provisions of the DMRC SHE Conditions each contractor must appoint an External Agency (approved by DMRC) to undertake External SHE Audit. The External SHE Audits must be undertaken every three months (quarterly) for the full term of the contract. The audit is conducted against a comprehensive check list which is based on every compliance point of the Contract conditions on Safety.
- iii. Site Inspection by General Consultants Safety Experts : Safety Experts of General Consultants are regularly visiting construction sites to monitor the compliance of Safety requirements. Observation Reports are prepared for the Non conformances found at site, for which the contractor is directed to submit the compliance report to DMRC
- iv. Monitoring by the DMRC Site Teams: The outputs from all of the above auditing and inspection activities are recorded and tracked and performance is monitored by DMRC. For each of the three layers of activity described above, where performance is seen to be lacking instructions are given for correction to be made.

**Question No. 3**

S. No	Compensation paid to dead men	Compensation paid to dead women	Compensation paid to injured men	Compensation paid to injured women	Head of Accounts under which the payments were made
1	₹ 5.5 Crores (approx)	₹ 155243/-	₹ 40.7 Lakhs (approx)	Nil	Compensation constitute of two components: a. Statutory Workmen compensation: It is paid by contractors. b. Labour Welfare fund compensation: It is an additional humanitarian compensation being paid by DMRC.
